

# Specifying Signing Order for Multiple Digital Signatures

To control the signing order on IMTs with multiple digital signatures, you will want to create logic formulas on all but the first signature. The formula placed in the button will make the signature inactive until the previous signature in the signing order is signed.

The  of  is

an If/Then/Else Formula

If  

== (equal to)

Then

ApprovingSignature.active =

Else

ApprovingSignature.active =

## In Designer:

1. Double click the signature button to view the signature button Properties
2. In the *Make This Button Active* section, click the **Add Formula** button to display the Formula dialog box
3. Click the drop down arrow to select a type of formula
4. Click to select "**determined by a decision (If/Then/Else)**"
5. Click the **If** drop down arrow on the left
6. Select "**value of...**"
7. Click the pointing hand 
8. Click the signature button that must be signed before this signature
9. Click the center drop down arrow
10. Select "**== (equal to)**"
11. Click in the text box under "**a number or text**"
12. Type the text that would appear on the face of the *unsigned* previous button

Example: **Click here to sign** (text must match exactly)

## Specifying Signing Order for Multiple Digital Signatures, continued

13. Click the **Then** drop down arrow
14. Scroll to the bottom of the list
15. Select "**off**"
16. Click the **Else** drop down arrow
17. Select "**on**"
18. Click **OK** to return to the Properties dialog box
19. Click **OK** to return to the IMT
20. Repeat steps 1 through 19 for each signature, except the first signature
21. Test the signatures in Viewer
